Author index volume 345 (2005)

The issue number is given in front of the page numbers.

- Bab, S. and A. Nickelsen, One query reducibilities between partial information classes (2–3) 173–189
- Baier, C., H. Hermanns, J.-P. Katoen and B.R. Haverkort, Efficient computation of time-bounded reachability probabilities in uniform continuous-time Markov decision processes (1) 2– 26
- Béal, M.-P., F. Fiorenzi and D. Perrin, A hierarchy of shift equivalent sofics shifts (2–3) 190–205
- Beaudry, M., J.M. Fernandez and M. Holzer, A common algebraic description for probabilistic and quantum computations (2–3) 206–234
- Bernardi, V., B. Durand, E. Formenti and J. Kari, A new dimension sensitive property for cellular automata (2–3) 235–247
- Beygelzimer, A. and M. Ogihara, The enumerability of P collapses P to NC (2–3) 248–259
- Böhler, E., C. Glaßer, B. Schwarz and K.W. Wagner, Generation problems (2–3) 260–295
- Czeizler, E., The non-parametrizability of the word equation $sil.gifxyz = zvx$: A short proof (2–3) 296–303
- de Alfaro, L., M. Faella, T.A. Henzinger, R. Majumdar and M. Stoelinga, Model checking discounted temporal properties (1) 139–170
- Domaratzki, M. and K. Salomaa, Decidability of trajectory-based equations (2–3) 304–330
- Durand, B., *see* V. Bernardi (2–3) 235–247
- Faella, M., *see* L. de Alfaro (1) 139–170
- Fernandez, J.M., *see* M. Beaudry (2–3) 206–234
- Fiorenzi, F., *see* M.-P. Béal (2–3) 190–205
- Formenti, E., *see* V. Bernardi (2–3) 235–247
- Fraigniaud, P., D. Ilcinkas, G. Peer, A. Pelc and D. Peleg, Graph exploration by a finite automaton (2–3) 331–344
- Geldenhuys, J. and A. Valmari, More efficient on-the-fly LTL verification with Tarjans algorithm (1) 60– 82
- Glaßer, C., *see* E. Böhler (2–3) 260–295
- Haverkort, B.R., *see* C. Baier (1) 2– 26
- Hemaspaandra, E., L.A. Hemaspaandra and H. Hempel, All superlinear inverse schemes are coNP-hard (2–3) 345–358
- Hemaspaandra, L.A., *see* E. Hemaspaandra (2–3) 345–358
- Hempel, H., *see* E. Hemaspaandra (2–3) 345–358
- Henzinger, T.A., *see* L. de Alfaro (1) 139–170
- Hermanns, H., *see* C. Baier (1) 2– 26
- Holzer, M., *see* M. Beaudry (2–3) 206–234
- Ilcinkas, D., *see* P. Fraigniaud (2–3) 331–344
- Ilie, L., P. Ochem and J. Shallit, A generalization of repetition threshold (2–3) 359–369
- Jensen, K. and A. Podelski, Special issue (1) 1– 1
- Kari, J., *see* V. Bernardi (2–3) 235–247
- Katoen, J.-P., *see* C. Baier (1) 2– 26
- Kawachi, A., H. Kobayashi, T. Koshihara and R.H. Putra, Universal test for quantum one-way permutations (2–3) 370–385
- Kobayashi, H., *see* A. Kawachi (2–3) 370–385
- Koshihara, T., *see* A. Kawachi (2–3) 370–385
- Koubek, V. and J. Kratochvíl, Preface (2–3) 171–172

- Kratochvíl, J., *see* V. Koubek (2–3) 171–172
- Kupferman, O. and M.Y. Vardi, From complementation to certification (1) 83–100
- Lee, T. and A. Romashchenko, Resource bounded symmetry of information revisited (2–3) 386–405
- Lugiez, D., P. Niebert and S. Zennou, A partial order semantics approach to the clock explosion problem of timed automata (1) 27– 59
- Majumdar, R., *see* L. de Alfaro (1) 139–170
- McMillan, K.L., An interpolating theorem prover (1) 101–121
- Nickelsen, A., *see* S. Bab (2–3) 173–189
- Niebert, P., *see* D. Lugiez (1) 27– 59
- Nordh, G., The complexity of equivalence and isomorphism of systems of equations over finite groups (2–3) 406–424
- Ochem, P., *see* L. Ilie (2–3) 359–369
- Ogihara, M., *see* A. Beygelzimer (2–3) 248–259
- Okhotin, A., The dual of concatenation (2–3) 425–447
- Peer, G., *see* P. Fraigniaud (2–3) 331–344
- Pelc, A., *see* P. Fraigniaud (2–3) 331–344
- Peleg, D., *see* P. Fraigniaud (2–3) 331–344
- Perrin, D., *see* M.-P. Béal (2–3) 190–205
- Podelski, A., *see* K. Jensen (1) 1– 1
- Putra, R.H., *see* A. Kawachi (2–3) 370–385
- Romashchenko, A., *see* T. Lee (2–3) 386–405
- Salomaa, K., *see* M. Domaratzki (2–3) 304–330
- Schwarz, B., *see* E. Böhrer (2–3) 260–295
- Selivanov, V.L. and K.W. Wagner, A reducibility for the dot-depth hierarchy (2–3) 448–472
- Shallit, J., *see* L. Ilie (2–3) 359–369
- Stoelinga, M., *see* L. de Alfaro (1) 139–170
- Su, Z. and D. Wagner, A class of polynomially solvable range constraints for interval analysis without widenings (1) 122–138
- Valmari, A., *see* J. Geldenhuys (1) 60– 82
- Vardi, M.Y., *see* O. Kupferman (1) 83–100
- Wagner, D., *see* Z. Su (1) 122–138
- Wagner, K.W., *see* E. Böhrer (2–3) 260–295
- Wagner, K.W., *see* V.L. Selivanov (2–3) 448–472
- Wich, K., Sublogarithmic ambiguity (2–3) 473–504
- Zennou, S., *see* D. Lugiez (1) 27– 59
